Professional Summary

Certified Web Penetration Tester with hands-on experience identifying and exploiting vulnerabilities in web applications. Skilled in OWASP Top 10, manual and automated testing, and producing clear, actionable reports. Passionate about securing web assets and helping development teams build secure code from the start.

Core Competencies

- Web App Pen Testing (Burp Suite, OWASP ZAP, Nikto, Dirb)
- OWASP Top 10 (SQLi, XSS, CSRF, SSRF, IDOR, etc.)
- Manual & Automated Vulnerability Assessment
- API Security Testing (Postman, Burp API Scanner)
- Reporting & Remediation Guidance
- Basic Scripting (Python, Bash)
- Linux (Kali, Parrot OS) & Windows Environments

Certifications

- **Certified Web Penetration Tester** (e.g., redfox/ Tryhackme / Burp Suite Certified Practitioner) – [Year]
- **CompTIA Security+** (or other foundational cert) – [Year if applicable]
- **PortSwigger Web Security Academy –** Completed [X] labs

Note: Add the actual certifying body (e.g., INE/eLearnSecurity, TCM Security, PortSwigger).

Technical Skills

Category	Tools / Technologies
Proxy Tools	Burp Suite Professional, OWASP ZAP
Recon	Nmap, Sublist3r, Amass, Shodan, FFuF
Exploitation	SQLmap, Commix, Metasploit (basic)
Dev/Reporting	Markdown, Jira, Confluence, Basic Python

Professional Experience

Web Penetration Tester (Freelance / Contract)
Self-employed / Upwork / Local Clients
2023 – Present

- Conducted over 15 web application penetration tests for small businesses and startups.
- Identified critical vulnerabilities including SQL injection, XSS, and broken access control in 80% of tested apps.
- Delivered clear, non-technical remediation reports for developers and management.
- Retested fixes and validated patches before final sign-off.

Junior Security Analyst (Intern or Entry Level)
[Company Name – e.g., Local ISP, Bank, or Tech Startup] · Addis Ababa
[Month Year] – [Month Year]

- Assisted senior pentesters with recon and manual testing of internal web apps.
- Performed vulnerability scanning using Nessus and OpenVAS.
- Documented findings and helped reproduce bugs in staging environments.

Projects & Portfolio Highlights

- **Bug Bounty Hunting –** Reported 5+ valid vulnerabilities on HackerOne and Bugcrowd (include if true).
- **Home Lab –** Built a vulnerable web app lab (DVWA, Juice Shop, PortSwigger labs) for continuous practice.
- **Write-ups –** Published 10+ detailed walkthroughs for CTF web challenges on TryHackMe / HackTheBox.
- **Portfolio Site –** `https://philportifolio.netlify.app/`– HTTPS-only, CSP headers, includes responsible disclosure policy.

Or self-study path:
Completed PortSwigger Web Security Academy (Apprentice → Practitioner tracks).

Additional

- **Language:** English (professional working proficiency)
- **Volunteer:** Mentored 3 students in web security basics
- **Interests:** Red teaming, API hacking, exploit development research
